

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

THE
JOURNAL OF INFECTIOUS DISEASES

The
Journal of Infectious Diseases

Published by the Memorial Institute for Infectious Diseases

EDITED BY
LUDVIG HEKTOEN AND EDWIN O. JORDAN

IN CONJUNCTION WITH
FRANK BILLINGS F. G. NOVY
W. T. SEDGWICK H. GIDEON WELLS

Volume 21
1917

Chicago, 1917

Composed and Printed by
American Medical Association Press
Chicago, Illinois U. S. A.

TABLE OF CONTENTS

	NO. 1, JULY, 1917	PAGE
The bacteriology of acute epidemic respiratory infections commonly called influenza		
<i>George Mathers</i>	- - - - -	1
A leptothrix associated with chronic bronchopneumonia		
<i>George F. Dick</i>	- - - - -	9
Intravenous injection of typhoid vaccine		
<i>Charles S. Kibler and L. F. McBride</i>	- - - - -	13
Agglutination in typhus fever		
<i>George Baehr</i>	- - - - -	21
The possibility of typhoid infection through vegetables		
<i>C. O. Melick</i>	- - - - -	28
The Voges-Proskauer and correlated reactions of coli-like bacteria		
<i>Max Levine, J. C. Weldin and Beryl R. Johnson</i>	- - - - -	39
Influence of oxygen tension on morphologic variations in <i>B. diphtheriae</i>		
<i>William B. Wherry</i>	- - - - -	47
Ninhydrin reaction in the examination of cerebrospinal fluid		
<i>N. Novick</i>	- - - - -	52
Nature of plague proteotoxins		
<i>Frederick Eberson</i>	- - - - -	56
American mortality statistics and the Mills-Reincke phenomenon		
<i>Emanuel B. Fink</i>	- - - - -	62
Effect of the injection of nonspecific foreign substances on the course of experimental rabies		
<i>W. H. Burmeister</i>	- - - - -	95
NO. 2, AUGUST, 1917		
The epidemiology of pellagra in Nashville, Tenn., II		
<i>James W. Jobling and William F. Petersen, Assisted by B. G. Tucker and F. C. Costen</i>	- - - - -	109
Development of antibodies for bacillus typhi-exanthematici in typhus fever contacts		
<i>George Baehr</i>	- - - - -	132
Fecal examinations of a regiment infected with bacillus paratyphosus A, with special reference to normal carriers		
<i>Charles Krumwiede, Jr.</i>	- - - - -	141
Isolation of typhoid bacilli from urine		
<i>Kan-Ichiro Morishima and Oscar Teague</i>	- - - - -	145
Results of blood cultures in rheumatoid arthritis		
<i>V. H. Moon and S. R. Edwards</i>	- - - - -	154
Correlations in the colon-aerogenes group		
<i>L. V. Burton and L. F. Rettger</i>	- - - - -	162
Tuberculosis of lymph nodes		
<i>Francis Harbitz</i>	- - - - -	196
Comparisons of the rate of gas-production by certain bacteria in raw and in pasteurized milk		
<i>Paul W. Allen</i>	- - - - -	219

NO. 3, SEPTEMBER, 1917		PAGE
The titration of diphtheria toxin in unilaterally nephrectomized guinea-pigs		
<i>H. Roswell Wahl</i>	- - - - -	227
Comparative study of different antigens and of different temperatures of incubation in the Wassermann test		
<i>J. Wheeler Smith, Jr., and W. J. MacNeal</i>	- - - - -	233
Thermal coagulation point of blood and serum		
<i>George F. Leonard</i>	- - - - -	249
Comparison between the subcutaneous and intracutaneous methods of testing the virulence of diphtheria bacilli		
<i>M. A. Smeeton</i>	- - - - -	254
Experiments in filtration of antihog-cholera serum		
<i>B. H. Edgington, Alvin Broerman and E. W. Porter</i>	- - -	258
The Schick test, with especial reference to the negro		
<i>Louis T. Wright</i>	- - - - -	265
Effect of tethelin on experimental tuberculosis		
<i>H. J. Corper</i>	- - - - -	269
Precipitin-production in allergic rabbits		
<i>Ludvig Hektoen</i>	- - - - -	279
A modification of the McCrady method of the numerical interpretation of fermentation-tube results		
<i>Abel Wolman and Herbert L. Weaver</i>	- - - - -	287
Immune reactions in rabbits injected with micrococci from acute poliomyelitis		
<i>George Mathers and Katherine Howell</i>	- - - - -	292
The etiologic agent and the localizing factor of the abscesses in myositis purulenta tropica		
<i>Ernest Linwood Walker</i>	- - - - -	298
A streptobacillus from urine		
<i>Herbert L. Celler and William Thalhimer</i>	- - - - -	303
Observations on the growth of streptococci in blood-carbohydrate medium		
<i>David John Davis</i>	- - - - -	308
Further observations on subcutaneous abscesses in rabbits. The carrier state and its relation to rabbit septicemia		
<i>David John Davis</i>	- - - - -	314
Inhibitory action of lactic acid on certain bacteria and fungi		
<i>Effie L. Macdonald</i>	- - - - -	322

NO. 4, OCTOBER, 1917

Surface sterilization of tissues for bacterial studies		
<i>David M. Davis and Robert Rosen</i>	- - - - -	327
Coccobacillus (foetidus) ozaenae of Perez		
<i>Herbert C. Ward</i>	- - - - -	338
Yeast-like fungi of the human intestinal tract		
<i>Harry Warren Anderson</i>	- - - - -	341
A stable pollen antigen		
<i>Ralph Oakley Clock</i>	- - - - -	387

TABLE OF CONTENTS

vii

	PAGE
Food accessory factors (vitamins) in bacterial culture with especial reference to hemophilic bacilli I	
<i>David John Davis</i> - - - - -	392
Preservation of anti-sheep hemolytic amboceptor in glycerol	
<i>Ralph Oakley Clock and Stanley Drew Beard</i> - - - -	404
Studies on pneumococci and streptococci	
<i>Paul W. Aschner</i> - - - - -	409

NO. 5, NOVEMBER, 1917

The etiology of common colds: The probable rôle of a filtrable virus as the causative factor: with experiments on the cultivation of a minute micro-organism from the nasal secretion filtrates	
<i>George B. Foster, Jr.</i> - - - - -	451
Some observations on hemolysin and acid production by streptococci	
<i>Shigeki Sekiguchi</i> - - - - -	475
Some factors in swimming pool control	
<i>William D. Stovall and M. Starr Nichols</i> - - - - -	484
Preparation and method of using toxin-antitoxin mixtures for active immunization against diphtheria	
<i>Abraham Zingher</i> - - - - -	493
Effect of anilin in rabbits	
<i>Mary Wilmarth Brown</i> - - - - -	497
Wassermann reaction with glycerolated human serum more than a year old	
<i>E. H. Ruediger</i> - - - - -	502
Rocky Mountain spotted fever in California	
<i>James G. Cumming</i> - - - - -	509
Complement fixation with a specific antigen in acute poliomyelitis	
<i>M. Neustaedter and E. J. Banzhaf</i> - - - - -	515

NO. 6, DECEMBER, 1917

Comparative value of methods of preparing pollen antigen	
<i>Ralph Oakley Clock</i> - - - - -	523
Chronic arthritis in swine	
<i>Shigeki Sekiguchi and Ernest E. Irons</i> - - - - -	526
The pathogenic effect and nature of a toxin produced by <i>B. paratyphosus</i> B.	
<i>E. E. Ecker</i> - - - - -	541
Differentiation of the paratyphoidenteritides group. II. Lead acetate agar	
<i>E. O. Jordan and Ruth Victorson</i> - - - - -	554
The hydrogen-ion concentration of cerebrospinal fluid. Studies in meningitis. I	
<i>A. Levinson</i> - - - - -	556
Alkaloidal and metallic precipitation of cerebrospinal fluid in the diagnosis of meningitis. Studies in meningitis. II	
<i>Shiro Tashiro and A. Levinson</i> - - - - -	571
The toxin of <i>Bacillus welchii</i> . I	
<i>Paul H. DeKruif, Theodore W. Adams and Paul M. Ireland</i> - -	580
The toxin of <i>Bacillus welchii</i> . II. The mechanism of infection with <i>B. welchii</i>	
<i>Paul H. DeKruif and Jesse L. Bollman</i> - - - - -	588
